Enrique, Attached please find a draft reply to the Navy's letter, along with the below draft email that we could send (possibly Monday) to congressionals once we send the letter out and it is posted to our website. If the letter looks good as is, I included a pdf for your signature. Otherwise, we can make edits today or tomorrow.

I'm on leave for the rest of the year, but am checking messages frequently today and tomorrow, and can talk if necessary. Wayne is also out, but Yolanda is in so may be able to address any quick questions.

Also, I'm reminding you to send the email to HQ that Yolanda sent to you on Dec 17. I will re-send that to you now.

Thanks, John

Subject: U.S. EPA – Hunters Point Naval Shipyard – Updates on the radiological retesting of onsite buildings

Office of Congresswoman Nancy Pelosi
Office of Senator Dianne Feinstein
Office of Senator Kamala Harris

Dear Colleagues:

We have committed to keep you updated on EPA's oversight of the Navy's radiological retesting at the Hunters Point Naval Shipyard site. This email is an update from our August 21, 2020 email (below).

Attached is a letter to the Navy from the Superfund and Emergency Management Director about the Navy's evaluation of the radiological remediation goals (or cleanup levels) for current, onsite buildings. EPA is dedicated to move this conversation forward, working with the Navy to resolve the concerns we identified in our August 20, 2020 letter.

Regards,
Sonam

{Please add on top of EPA's August 21, 2020 email}
